

The Integration of Technology into Foreign Language Teaching

Mustafa Altun

Abstract

Technology-based foreign language teaching has provided many effective strategies in the learning process. The use of technology in teaching leads to a good command of the target language with ease. Learners stand a better chance of improving their foreign language skills if learning is strengthened with technology; therefore, technology-aided learning environment is a key factor that motivates the learners to accomplish better. This study puts forward how technology-based instruction helps learners achieve success in foreign language learning process.

Key Words: Technology, Foreign language learning, Achievement, Integration.
